National Standard Standard Practice for  
Magnetic Particle Examination1 This  
standard is issued under the fixed  
designation E 1444; the number immediately  
following the designation indicates the year  
of, Acceleration of auroral charged particles  
invariably accompanies a magnetospheric  
disturbance that causes an aurora. This  
mechanism, which is believed to  
predominantly arise from strong electric  
fields along the magnetic field or  
wave-particle interactions, raises the velocity  
of a particle in the direction of the guiding  
magnetic field.
