the enabling technology that allows

nanoscale CMOS beyond 20nm. This

technological revolution does not only allow

highest integration density for high volume

products at low cost., At MACOM we design,

manufacture, and support a range of low

noise amplifiers for RF, microwave, and

millimeter wave applications. The low noise

amplifiers cover a frequency range of 20

MHz to 86 GHz operation for a wide range of

applications, including network infrastructure,

radar and communication systems., Learn

An ideal transformer is a theoretical, linear transformer that is lossless

and perfectly coupled. Perfect coupling implies infinitely high core magnetic permeability and winding inductances and zero net magnetomotive force.
