Non-Impact Printing Non-impact printing

(copiers, laser printers) competes against

conventional printing processes and

constitutes the best alternative for printing on

demand and small print runs. The focus is on

full-color and digital printing., A high-speed

printer capable of printing an entire line at

one time. A fast line printer can print as many

as 3,000 lines per minute. The

disadvantages of line printers are that they

cannot print graphics, the print quality is low,

and they are very noisy. Other Impact Printer

Are. 1., Within the Non Impact Printing

technology, ink jet drop-on-demand ink jet

printing printing enjoys high popularity due to

its flexibility to print monochrome and color

on any surface. Ink jet applications include

monochromatic and color office printers and

industrial printers for marking, addressing,

coding and wide-format printing for posters.,

Full Color Digital printing has advanced

wonderfully in recent years, and continues to

advance. Impact Printing is committed to the

highest quality product in the Denver

Colorado area, offering the right solution for

your small to medium size project., All

printers have three main components: the

printing mechanism itself, paper feed

mechanism, and the control and interface

electronics. Printers are divided into the two

broad categories of impact and non-impact

printers. Figure 1 A classification of impact

printers. shows the various categories of

impact printers., They are characterized

using various criteriaâ€™s. The basic types

of printers are the impact and non impact

printers. Impact printers. ... They print 1000
