The DCT, and in particular the DCT-II, is

often used in signal and image processing, especially for lossy compression, because it has a strong "energy compaction" property: in typical applications, most of the signal information tends to be concentrated in a few low-frequency components of the DCT., In digital audio data reduction technology, aptX (formerly apt-X) is a family of proprietary audio codec compression algorithms currently owned by Qualcomm, the essence of knowledge FnT SIG 1:1-2 Introduction to Digital Speech Processing Lawrence R.
